

# No PCI Headaches with OrderPort Payments

**Better Tools. Better Winery.**

# No PCI Survey with OrderPort Payments

**Better Tools. Better Winery.**

## Introduction

We are excited to share that OrderPort now manages PCI compliance maintenance for OrderPort Payments users!

You may already be familiar with the PCI compliance survey. These forms can sometimes be quite lengthy and include technical questions that many winery teams are not used to navigating. In some cases, wineries may also encounter monthly PCI program fees as part of maintaining compliance.

To make things easier for our customers, OrderPort has taken on the responsibility of managing PCI compliance for OrderPort Payments users, simplifying the process so your team can stay focused on what matters most: hospitality, sales, and growing your winery.

***PCI compliance covered. No paperwork. No PCI fees.***

## Why do wineries have to complete PCI surveys with other processors?

Many processors require businesses to self manage PCI compliance by completing lengthy surveys that confirm card data is handled securely. The problem is that most wineries are not payment security experts, and the forms can be complicated to navigate. Even when completed correctly, wineries are often charged monthly PCI program participation fees.

## What happens if the survey is filled out incorrectly or not completed?

If the survey is incomplete or submitted incorrectly, processors may add PCI non compliance fees. These can reach \$100 per month or more until the issue is resolved. In other words, wineries end up paying for paperwork that was confusing to begin with.

## How does OrderPort Payments handle PCI compliance differently?

PCI compliance is fully handled through our secure infrastructure and Stripe powered payment processing.

**That means:**

- No PCI surveys to fill out
- No PCI program participation fees
- No PCI non-compliance penalties

***PCI compliance is handled for you, so your team can focus on running the winery.***
